**THE REPORT**  
**OF THE**  
**PRESIDENT OF QUEEN'S COLLEGE, BELFAST,**  
**FOR THE**  
**YEAR 1897-98.**

---

TO THE QUEEN'S MOST EXCELLENT MAJESTY.

MAY IT PLEASE YOUR MAJESTY :

I have the honour to present to Your Majesty my annual Report on the condition and progress of Queen's College, Belfast, during the academic year 1897-98.

**THE ENTRANCES OF THE YEAR.**

The number of students who entered the College for the first time during the Session was 113, being 5 more than in the previous year.

**THE ATTENDANCE.**

The number of students enrolled, and in attendance in the various Faculties during the Session, was as follows:—in the Faculty of Arts 135, in the Faculty of Medicine 223, in the Faculty of Law 23, and in the School of Engineering 17. These figures show increases on last year in every School except that of Medicine, in which there were 4 students less. In the Arts classes, on the other hand, there was an increase of 13 in the numbers enrolled, in the Law School an increase of 3, and in the School of Engineering of 2.

**LADY STUDENTS.**

Fifteen of the students during last Session were ladies—viz, 4 in Arts, 10 in Medicine, and 1 in Law—and it is worthy of note, now that the College is as freely open to women as to men, that several of these distinguished themselves much in the Examinations. One young lady, Miss Margaret Stouppe, gained a high Entrance Scholarship on the literary side; another, Miss Mary Elizabeth Clements, won the highest First Year Scholarship in Law; and at the Class Examinations held at the close of the Session, several others carried off first and other prizes.

Short as the time has been during which the College has been open to women, it is interesting to observe that 40 of them, who have been educated within its walls, have taken degrees, 35 of these being in Arts, 3 in Medicine, and 2 in Law.

### THE DISCIPLINE OF THE COLLEGE.

I am glad to say that I have the same report to make regarding the discipline of the College as it has been my good fortune to present in every year since I became President. Nothing could have exceeded the good behaviour of the students during the Session just ended. Indeed, during the last ten years the Council has not been called upon to inflict a single penalty for breach of College law.

### THE HONOURS OF THE YEAR.

There was the usual keen competition last Session for the College Scholarships, and the answering on which they were awarded not only showed no falling off from that of former years, but was in several instances so high that the Council felt constrained to award, not only the Scholarships which had been offered, but additional prizes. It is our good fortune to possess not only the Scholarships which have been established by the State, but other Scholarships and Studentships founded by private munificences, which perpetuate among us such honoured names as Andrews, Danville, Porter, Sullivan, and Pakeman. All these were awarded last Session after searching examinations.

Outside our own walls, at the Royal University, the University of Oxford, the University of Cambridge, and King's Inns, students from this College took during the past Session the same high places as in former years. A full list of these honours will be found in the Appendix to this Report. Here I can only mention the more conspicuous and outstanding of them.

In October last honorary degrees were conferred by the Royal University upon two of our Professors, who are also *alumni* of the College—the degree of *M.A.O. honoris causa* upon Professor Byers, M.D., and that of M.A. upon Professor Whitha, M.D. Another member of our staff, who is also an *alumnus* of our own, Professor Strahan, was appointed during the winter a Reader in the Law of Property at Lincoln's Inn. Mr. R. K. McElerry, M.A., received a Fellowship in St. John's College, Cambridge, and Mr. W. A. Houston, M.A., who last year was placed in the first division of first class in the Cambridge Mathematical Tripos, was this year awarded a Smith's Prize. Mr. Ernest W. McBride, who had gained a Fellowship in St. John's College, Cambridge, and the Walsingham Medal of the University for original work in Natural Science, was last year appointed Professor of Natural Science in McGill University, Montreal. Mr. R. M. Jones, M.A., has been appointed Principal of the Royal Academical Institution, Belfast, in succession to another Queen's College man, Mr. Robert Dods, B.A. Mr. Benjamin Moore, M.A., has been appointed Assistant Professor

of Physiology in University College, London; Mr. Wilfred H. Everett, B.A., B.E., Demonstrator in Engineering in University College, Nottingham; and Mr. Henry Hanna, M.A., B.Sc., Demonstrator in Biology, Geology, and Palæontology in the Royal College of Science, Dublin. Mr. Wm. Hanna, M.A., M.D., took first place in Bacteriology at the examinations of the University of Cambridge for the diploma of D.P.H. Mr. W. N. Watts, LL.D., was appointed an Examiner in the Law of Contracts to the Honourable Society of the King's Inns. Mr. Henry Hanna, LL.B., was awarded the Medal offered by Lord Justice FitzGibbon at the Law Students' Debating Society for the best essay on "The Irish University Question." Mr. R. R. McCutcheon, B.A., gained the John Brooke Scholarship at King's Inns, this being the sixth occasion during seven years on which this, the highest distinction conferred by the Benchers, has been won by an Ulster student, and Mr. John H. Robb, B.A., won a Victoria Prize.

At the Royal University a large number of honours were gained by our students, the highest being the winning of the Junior Fellowship in Chemistry and Experimental Physics by Mr. Frederick G. Donnan, M.A., on very remarkable answering. It is a noteworthy fact that since the institution, four years ago, of these splendid prizes (the pecuniary value of each of which is £200 per annum for four years) four of them have been gained by alumni of this College, one in Classics, one in Mathematics, one in Mental and Moral Science, and this year one in Chemistry and Experimental Physics. A list of the Exhibitions, Prizes, and First and other Honours gained at the various Degree Examinations of the Royal University will be found appended.

Two other honours of a different kind which were conferred upon two former students during the year evoked feelings of the liveliest gratification in the College. Mr. J. McLeavy Brown, B.A., H. M. Chief Commissioner of Customs in Corea, whose splendid services in upholding British interests in the Far East at a time of exceptional strain, called forth general admiration, was created C.M.G., and Mr. J. Newell Jordan, M.A., C.M.G., who co-operated so ably with him, was appointed H. M. *Chargé d'Affaires* at Seoul. Nowhere was deeper satisfaction felt at the bestowal of these well-deserved honours than in this College, where both gentlemen are still well remembered.

#### THE REPORTS OF THE DEANS OF RESIDENCES.

I have received the following reports from the Deans of Residences, whose zealous and disinterested attention to the students under their care is deserving of the highest praise. I give the reports in the order of the seniority of the Deans:—

"St. Andrew's Rectory,  
"University Square,  
"Belfast, June 15, 1898.

"DEAR MR. PRESIDENT,—In response to your letter of the 7th, I have the honour of reporting that the students of Queen's College

Belfast, members of the Church of Ireland, have been marked, as well as the students generally, by conduct and deportment of a high Christian, moral, and gentlemanly character.

"At the beginning of the Session a large meeting was held in the Union Buildings of the College—a place which is becoming of the greatest value to the students, and attended as it was by many of the heads of the College, together with the Deans, the meeting gave, I have no doubt, tone and direction to the whole Session.

"Under the sanction of the Deans the Christian Union has held a large number of meetings during the Session:—twenty-two weekly general meetings, several weekly and fortnightly conversational classes, a "Bible circle," seven general meetings among the lady students, and twenty religious meetings; besides meetings for the reception of delegates from English Christian Unions, &c.

"The result of all this, I am happy to say, is plainly evident in the conduct and demeanour of the students generally. It gives me unfeigned pleasure to submit this most favourable report.

"I remain, dear Mr. President,

"Your faithful Servant,

"S. HOWARD BUSHY, Clk., LL.D., T.C.D.,

"Dean (I.C.), Q.C.B."

---

"College Park, Belfast,  
"8th June, 1898.

"DEAR SIR,—I have much pleasure in reporting that the conduct and character of the students belonging to the Presbyterian Church have been, as far as known to me, most satisfactory during the Session.

"The members of the Students' Christian Union exercise a healthy religious influence in the College, and their meetings are regularly maintained.

"I am,

"Yours faithfully,

"MATTHEW LEITCH,

"Dean of Residences for Students of  
"the Presbyterian Church.

"To The President,  
"Queen's College."

---

"Methodist College, Belfast,  
"29th June, 1898.

"DEAR DR. HAMILTON,—The report I have to give you of the students under my care is most satisfactory.

"So far as I have an opportunity of observing, their conduct has been invariably that becoming their Christian profession.

"I am, very truly yours,

"WM. NICHOLAS, D.D.,

"Dean of Residences (Methodist).

"To Rev. Dr. Hamilton,  
"President,  
"Queen's College, Belfast."

"Redburn, Adelaide Park,  
"JUNE 9, 1898.

"DEAR SIR,—I am glad to be able to report favourably of the students under my care.

"Yours faithfully,

"DOUGLAS WALMSLEY.

"To the President,  
"Queen's College, Belfast."

### THE LIBRARY.

During the year very careful attention was given to the Library by the Library Committee and the Librarian. The number of volumes added was 807, and of other publications 146, or 953 in all. Most of these were purchased, but for a considerable number we were indebted to the thoughtful kindness of friends. A full list of the donations will be found in the Appendix.

One acquisition which the Library received during the year excited particular interest, not only on account of its intrinsic value, but for the sake of the associations connected with it. I refer to the gift by Mrs. and Miss MacDonall of the MS. remains of the late Dr. Charles MacDonall, whose tenure of the Chair of Greek during the years 1850-78 is still vividly remembered with gratitude and affection by many who, like myself, enjoyed the privilege of sitting at his feet.

Among the other important presentations were "Annals of the Royal Botanical Gardens, Calcutta," 5 vols., given by Professor Cunningham; "Collected Scientific Papers of John Couch Adams," by the Adams Memorial Committee; "The Norwegian North Atlantic Expedition," by the Norwegian Government; "Index-Catalogue of the Library of the Surgeon-General of the U.S. Army," by the Surgeon-General; "The Gifford Lectures," 8 vols., by the *Senatus Academicus* of the University of Edinburgh; "Opere di Galileo Galilei, Edizione Nazionale," by the Minister of Public Instruction, Rome; "Transactions of the Royal Academy of Medicine in Ireland," by the Academy; "Transactions du Congrès International de Gynécologie, Geneva, 1897," 3 vols., by Professor Byers.

To the deep regret of all in the habit of using the Library, it lost during the Session the services of Mr. William Taylor, who had been Librarian's Assistant since the year 1879, and had discharged his duties with much ability and fidelity. Failing health obliged him, I am sorry to say, to resign in May last. He carries with him into his retirement the sympathy and good wishes of the entire College.

## THE MUSEUMS.

Our various Museums have been well maintained during the year. A considerable number of valuable specimens have been purchased for the Museum of Natural History, which has also been enriched by various presentations. I am happy to be able also to state that its accommodation is being augmented by the erection of a new gallery, with wall cases and fittings. This will afford means for the preservation and exhibition of many treasures which Professor Cunningham has not hitherto been able properly to utilise. Professor Symington has, with the willing and valued aid of a number of young medical men, been engaged in the cataloguing and re-arrangement of the Medical Museum, a task which, when completed, will materially facilitate its use. Full lists of the donations to these Museums will be found appended. The Museum of Materia Medica has also been carefully looked after under the supervision of Professor Whittle.

It gives me pleasure to state that I received during the Session a welcome and quite unsolicited donation from "Two Friends," who desire that their names shall not be divulged, for the purpose of commencing the establishment of a Museum of Sanitary Science. Such an institution will, when opened, not only prove undoubtedly valuable to the department of Sanitary Science in the College, which Dr. Lettis and Dr. Whitaker are assiduously labouring to develop, but will, I hope, render essential service to the health of the entire community in which our lot is cast. I am always glad to hear of such donations for the extension of the work of the College. The fewness of them, as compared with the large number which are constantly received by colleges in England, Scotland, and America, has often been a subject of comment and surprise.

## THE STUDENTS' UNION.

The Union, which, it will be remembered, was opened last year, has had a very useful and prosperous Session, and more and more, as time goes on, its value becomes apparent. Its dining-room, reading-room, debating-hall, and recreation-rooms are largely frequented both by graduates and undergraduates, and it has afforded me the utmost pleasure to observe the decorum and business-like capacity with which its affairs are conducted. It has now been resolved to add to its equipment by the establishment of a Library, which, it is expected, will be ready for use in October next. Open, as the membership of the Union is, to all *alumni* and students of the College at a very small fee, and offering to them most valuable advantages, intellectual, social, and hygienic, I trust that not only will the students in actual attendance continue to connect themselves with it in large numbers (my opinion being that every student should seek membership in it), but that more and more of our graduates will associate themselves by its means with the present generation of collegemen.

The report of the Union which was presented and adopted at its annual meeting of 24th March last has been submitted to me. I find from it that there were last Session 177 ordinary, and 78 life members, or 255 in all, and that, after paying all charges, a balance of £42 3s. 3d. remained to credit. For the purpose of endowment a well-secured ground-rent in Belfast has been purchased, at a cost of £2,030, and vested in trustees. This yields an annual income of £79 4s. To assist in making this purchase, which was deemed a very desirable one in every way, a sum of money was borrowed from the bank, which I hope the Committee will soon be able to pay off.

The other

#### COLLEGE SOCIETIES

appear to have had useful and successful Sessions, the Literary and Scientific Society under the Presidency of Mr. J. W. D. Megaw, B.A., and the Medical Students' Association under that of Mr. W. A. Rice, B.A. The former Society will attain its jubilee early next year. It has had a most useful career and a deeply interesting history since its foundation in February, 1850. Among those who have occupied its Presidential Chair have been such men as Mr. Edwin Godkin, now the well-known Editor of the *New York Nation and Daily Post*, who was President in 1850-51, Sir William MacCormac, Bart., now President of the Royal College of Surgeons, England; Mr. W. Pirrie Sinclair, Liverpool; the Right Hon. Thomas Sinclair, M.A., D.Lit.; Professor Park, D.Lit.; Mr. T. G. Houston, M.A., Principal of the Coleraine Academic Institution; Mr. J. B. Dougherty, M.A., Assistant Under Secretary and Clerk of the Privy Council; Professor MacMullan, M.A.; and Mr. Hans M'Mordie, M.A. For half a century the art of public debate has been cultivated under its auspices by successive generations of students, not a few of whom have acknowledged their indebtedness to the training which they received at its meetings. I am informed that it is in contemplation by the members of the Society to celebrate its jubilee in a fitting manner, and I feel sure that, if this is done, the occasion will recall many a pleasant memory and prove full of interest and enjoyment.

It was with sincere and deep pleasure that I this year attended the annual re-union of another Society, not composed, like those to which I have been referring, of students in attendance at College, but of past members. I allude to the

#### ASSOCIATION OF OLD BELFAST QUEEN'S COLLEGE MEN, LONDON.

It was to me a most delightful and inspiring thing to find that in London several hundreds of our *alumni*, resident in the metropolis or within reach of it, have banded themselves together in this society, finding a common bond and centre of union in their connection with their *alma mater*, and all animated by the most pleasing spirit of loyalty and affection towards her.

The meeting was held under the chairmanship of Mr. R. A. McCall, M.A., LL.D., Q.C., the President for the year, who succeeded in this office Sir Wm. MacCormac, Bart., President of the Royal College of Surgeons. Among the Vice-Presidents and Committee are Sir David Barbour, K.C.S.I.; the Rev. A. J. C. Allen, Professor Strahan, LL.B. (to whom the Association owes much); the Rev. J. Thoburn McGaw, D.D.; Professor Lunnor, F.R.S.; Mr. J. A. Rontoul, LL.D., M.P.; and Professor Perry, F.R.S. The Hon. Secretaries are Mr. J. R. Fisher, B.A., and Dr. J. Arthur Browne. A Society like this is one of the best possible illustrations of the value of a College which has succeeded in so commending itself to its *alumni*, that, even when far removed from Belfast and immersed in the engrossing pursuit of their various avocations in life, they delight to call themselves by its name, and to meet together to rehearse the memories of their student days; and it is at the same time, I take leave to say, a source of no little confidence and strength to the College to feel that it has at its back a body of such *alumni*, so numerous, so influential, and whose hearts beat so true to their *alma mater*.

#### THE PRESENT CONDITION OF IRISH UNIVERSITY EDUCATION.

It is thus my good fortune to be able to present to Your Majesty a very favourable report upon the condition and progress of the College in regard to all the points to which I have referred. I do not think that it ever possessed an able or more zealous body of Professors, and the account which I have been able to give of the discipline of the Students, and the long list of distinctions which they have gained and which are here recorded, clearly show that there is no deterioration either in their demeanour or in their intellectual stature and attainments. The College, in my judgment, is as vigorous, its spirit is as high, its aims are as noble, and its work, within the limits assigned to it, is as successful as in the painted days of its history.

But I do not think that I should be doing my duty, or giving an absolutely correct account of its condition, if I were to stop here and to leave the impression that everything about the College is what one could wish. That, unfortunately, is not the case. In all the matters to which I have referred, in all the matters which lie within its province and direct power, everything goes well. But there is a fly in the box of ointment. There is a mischief of a most serious character which militates against the interest and work of the College in the most unhappy manner. I refer to its status and function as settled, or rather unsettled, by the Irish University legislation of twenty years ago. Into a full discussion of this subject it were as impossible as it is unnecessary here to go. Suffice it to say that this College and the higher education, not only of Ulster but of the whole of Ireland, have suffered sadly by the changes which were then introduced, and the misery of the situation is accentuated by the fact that, with all the evil that has been done, no creed or class is satisfied, and the changes introduced have left the question as far from a permanent settlement as ever.

In my Report of last year I said:—

"I consider that I should fail in my duty, and be untrue to my convictions, did I not state in this Report that in my opinion the present condition of University education in Ireland is unsatisfactory in the extreme. This is not the place for a discussion of the question in all its ramifications, but the time has come when it is, in my judgment, quite necessary to say so much. As regards this College in particular, by the passing of the University Education (Ireland) Act of 1879, it was shorn of much of its power and usefulness, and the higher education, not only of the North of Ireland but of the whole country, has suffered serious detriment to an extent which only those who are called, as we are, to deal practically with the matter every day, can fully realize or understand. I sincerely trust that an effort will be made at an early period to undo, by wise legislation, the evil that has been done. It is admitted, even by its enemies, that this College has done a great work for the country, and such is its inherent vitality, and so strong its position, that, notwithstanding the grave difficulties with which it has to contend, it is still doing work, as this Report is itself sufficient to show, of which any College in the kingdom might be proud. It only needs to be placed by the State on such a basis as, in the estimation of all thinking men among us, it ought to occupy, to rise in a generation or two to a most commanding position in the country. Apart from our own particular interests, also, no one who has understanding of the times can fail to see that Ireland generally needs such a re-adjustment of the machinery of University education as will enable all Irishmen, both in the North and the South of the island, to enjoy, if they will, the advantages of true University life and culture without impediment of any kind."

By the opinions thus expressed I firmly held. The question now is—what should be done? Of course it would be much easier to do nothing, simply to let things drift. The policy of *laissez faire* will always have its advocates. But, in my opinion, he is neither the true friend of Ireland or of education who advocates that course, or who keeps silent in the presence of the existing condition of affairs through fear of the consequences of speech or action. That steps should be taken by Parliament to remedy the existing evils of the situation, I held strongly. What exact course legislation on the subject should take, either as regards this College and the North of Ireland, or in the interests of the whole country, it is not my business to say. But to any one sincerely anxious for the education and general prosperity of Ireland, and cognizant of the evils of the present situation, as one called to deal practically with it from day to day, as I am, must be, the present position of affairs is well nigh intolerable, and the statesman who will rid us of it will be entitled to the everlasting gratitude of the whole country.

In the Appendix to this Report I have placed lists of the Officials of the College, together with a series of tables showing (1) the Number of Students matriculated in the Session 1897-98; (2) the Numbers and Religious Persuasions of the Students who have entered in each year since the opening of the College and the Numbers and Religious Persuasions of the Students who have attended in each year; (3) the Numbers

attending in each Faculty during the Session now ended; (4) the Number of Students who came to the College from each of the provinces of Ireland, and from other places, during the Session; (5) the Ages of the Students in attendance; (6) the Number of Lectures given by each Professor during the Session, and the Number of Students attending each Class; (7) the names of the College Scholars and Prizemen for last Session; (8) a list of Degrees, Diplomas, and Honours obtained by Students of the College at the Examinations of the Royal University of Ireland in 1897; (9) a list of sundry Students who have obtained distinctions in Universities other than the Royal University of Ireland; (10) a Table showing the Length of Service, Salaries, and other Emoluments of the Professors and Officers of the College; (11) a list of Benefactors of the College since its foundation, with an account of their Benefactions; and (12) an account of the Receipts and Expenditure of the College during the year ending 31st March, 1898.

All which is testified on behalf of the College by

Your Majesty's

Most dutiful servant,

THOMAS HAMILTON,  
PRESIDENT.

July, 1898.

TABLE X.—BENEFACTORS of QUEEN'S COLLEGE, BELFAST,  
since its Foundation in 1845.

Ann.

1847. Presented by Charles Davis, Esq., a large oil painting of the Assassination of Peter the Martyr, by Atkins, being a copy of the original painting by Titian.

— Presented by Professor Craik, a portrait of Confucius.

1851. The Governors of the Armagh Observatory, with the sanction of Her Majesty, transferred to the College the Transit Instrument and Astronomical Clock which were formerly in the Observatory at Kew.

The Lords of the Admiralty, on the recommendation of the Astronomer Royal of England, assented to an application from Professor Wilson for transferring to the College a Mural Circle by Jones, which had been in use at the Cape of Good Hope.

For the reception of these instruments an Observatory was erected on the College grounds, the expense having been defrayed by subscription.

1854. Presented by W. P. Wilson, Esq., M.A., former Professor of Mathematics in the College, a Bust of Sir Isaac Newton.
